Qn. Set Code-7

Semester: 6th
Programme: B.Tech
Branch: CSE, IT, CSCE, CSSE, CE

SPRING END SEMESTER EXAMINATION-2025

6th Semester B.Tech

UNIVERSAL HUMAN VALUES

HS30401

(For 2022 & Previous Admitted Batches)

Time: 2 Hours 30 Minutes | Full Marks: 50

Answer any FIVE questions.
Question paper consists of two SECTIONS i.e. A and B.
Section A is compulsory.
Attempt any Four question from Sections B.
The figures in the margin indicate full marks.
Candidates are required to give their answers in their own words as far as practicable and all parts of a question should be answered at one place only.

SECTION-A

1. Answer the following questions. [1 × 10]

(a) What should be the content for self-exploration?

(b) Distinguish between animal consciousness and human Consciousness.

(c) Explain the meaning of education-sanskar.

(d) Is there any difference between prosperity and accumulation of wealth? Explain with one example.

(e) What are three possible sources of motivation for imagination?

(f) Write down the four important aspects of relationship.

(g) Distinguishing between love and infatuation.

(h) List out the three kinds of obsession.

(i) List the four orders in nature with examples.

(j) What do you understand by definitiveness of ethical human conduct?

SECTION-B

2. (a) Briefly describe the Guidelines for Value Education. [5]

   (b) Explain the different characteristics of natural acceptance with suitable example. [5]

3. (a) Why is right understanding required for ensuring physical facility? How does it result in mutual prosperity? Illustrate with the help of two personal examples. [5]

   (b) Critically examine the prevailing notions of happiness and prosperity in the society. What are the consequences of these notions? [5]

4. (a) Human being is the co-existence of the self and the body. What are three specific distinguishing attributes of the self and the body? Explain with examples. [5]

   (b) Explain the activities of the Self with a diagram. With the help of an example, show how are they related. [5]

5. (a) Give one example each of over evaluation, under evaluation and otherwise evaluation. Why are these evaluations leading to disrespect? What problems do we face because of these wrong evaluations? [5]

   (b) Narrate about the programs needed to achieve the Comprehensive Human Goal with suitable diagram. [5]

6. (a) The four orders in nature have been classified on the basis of their distinct activity, innateness, natural characteristics and inheritance. Explain with one example for each order. [5]

   (b) Why is the human order, by and large, not mutually fulfilling for any of the four orders? Is your natural [5]

acceptance to be fulfilling for all four orders? What does human being need to do to be mutually fulfilling for each of the four orders?

7. (a) Explain the term 'Professional Ethics'. Discuss the prevailing approaches towards the promotion of Professional Ethics and their inadequacy. What would be an effective way to work towards developing ethical competence? [5]

   (b) Explain the holistic management model and discuss the specific characteristics/criteria of such a model. [5]

*****

SPRING END SEMESTER EXAMINATION-2025
6th Semester, B. Tech (Programme)

UNIVERSAL HUMAN VALUES

HS 30401

SECTION-A

1. Answer all

	(a)	**What should be the content for self-exploration?** The content for self-exploration basically has the following two subparts: a. Desire: What is our basic aspiration? b. Programme: What is the way to fulfil this basic aspiration? ***(0.5 mark Each)***
	(b)	**Distinguish between animal consciousness and human Consciousness.** The basic aspirations of human being, i.e., happiness, prosperity and its continuity, are fulfilled by right understanding, relationship and physical facility, in that priority order. Therefore, a human being living with all three is living with '***human consciousnesses'***. On the other hand, if one is living for physical facility alone, one is living with '***animal consciousness'***. ***(0.5 mark Each)***
	(c)	**Explain the meaning of education-sanskar.** ***Education*** is developing the right understanding (holistic perspective). ***Sanskar*** is the commitment, preparation and practice of living with right understanding. The preparation includes learning appropriate skills and technology. ***(0.5 mark Each)***
	(d)	**Is there any difference between prosperity and accumulation of wealth? Explain with one example.** There is a difference between ***accumulation of physical facility and the feeling of prosperity***. It is generally assumed that the richer you are, the more prosperous you are; the more you have accumulated, the more prosperous you are. ***Prosperity*** is the feeling of having or producing more than required physical facility. ***(0.5 mark +any example- 0.5 mark)***
	(e)	**What are three possible sources of motivation for imagination?** There are three possible sources of motivation for imagination. ***(1 Mark)*** 1. Preconditioning 2. Sensation 3. Natural Acceptance
	(f)	**Write down the four important aspects of relationship.** ***(1 Mark)*** The important aspects of relationship: 1. Relationship is – between one Self (I1) and another Self (I2) 2. There are feelings in relationship – in one Self (I1) for the other Self (I2) 3. These feelings can be recognised – they are definite 4. The fulfilment of these feelings and their right evaluation lead to mutual happiness
	(g)	**Distinguishing between love and infatuation.** Love is the feeling of being related to all. The feeling of love is, of course, not based on sensation. On the other hand, infatuation is an attraction based on sensation. The excitement from sensual pleasure is the central issue. Infatuation is conditional on getting the desirable sensations. ***(0.5 mark Each)***
	(h)	**List out the three kinds of obsession.** ***(1 Mark)*** Three kinds of obsessions are 1. Obsession for consumption 2. Obsession for profit 3. Obsession for sensual pleasure

	(i)	**List the four orders in nature with examples.** ***(1 Mark)*** 1. Physical order – this includes units like air, water, metal and so on. 2. Bio order – this includes grass, plants, trees, etc. 3. Animal order – this includes animals and birds. 4. Human order – this includes human being.
	(j)	**What do you understand by definitiveness of ethical human conduct?** ***(1 Mark)*** The right understanding gained through self-exploration enables us to identify the definitiveness of human conduct which may also be called the ethical human conduct. It is the same for all human beings. So, we are also able to understand the universality of ethical human conduct which is in consonance with the universal human values. **SECTION-B**
2.	(a)	**Briefly describe the Guidelines for Value Education.** Given below are the broad guidelines: **1. Universal** Whatever we study as value education has to be universally applicable to all human beings and be true at all times and all places. This implies that it should not change depending upon sect, creed, nationality and gender, etc. It has to deal with universal human values. For example, the feeling of respect in relationship is something universal, so it can be a part of value education. **2. Rational** It has to be amenable to reasoning and not based on dogmas or blind beliefs. It should be open to address the related questions. It cannot be a set of sermons or do's and don'ts. **3. Natural and Verifiable** We want to study something that is natural to us. Being natural means, it has to be acceptable in a natural manner. When we live on the basis of such values that are natural to us, it leads to mutual fulfilment. It leads to our happiness and it is also conducive to the happiness of other people we interact with, as well as enriching for other units in nature. **4. All Encompassing** The content of value education has to cover all dimensions of our being (thought, behaviour, work and understanding) as well as all levels of our living (individual, family, society and nature/existence). It is not merely an intellectual exercise or information transfer. **5. Leading to Harmony** Finally, value education has to enable us to be in harmony within and in harmony with others. Hence, when we live on the basis of these values, we start observing that it leads to harmony in us and harmony in our interactions with other humans and the rest of nature.***(1 mark Each)***
	(b)	**Explain the different characteristics of natural acceptance with suitable example.** Some of the characteristics of natural acceptance are: 1. **Natural acceptance does not change with time**: For example, our natural acceptance for the feeling of trust, for the feeling of respect in relationship remains invariant. 2. **Natural acceptance does not change with place:** Naturally acceptable feelings, like trust, respect, affection, etc. remain invariant with place. These feelings are naturally acceptable to me when I am in India, in America, in Africa, in Europe or in any other place. 3. **Natural acceptance does not change with the individual:** We can check with the naturally acceptable feelings once again and find out if they are naturally acceptable to Indians, to Americans and to any and every human being. Our assumptions, our likes and dislikes, our

		views on issues may vary; but the feelings that are naturally acceptable to one are also naturally acceptable to every human being. 4. **Natural acceptance is uncorrupted by likes and dislikes or assumptions or beliefs:** For example, even if we are preconditioned for years 'not to trust anyone', if we ask the question as to what is naturally acceptable trust or mistrust', the answer is in favour of trust. 5. **Natural acceptance is innate; we don't need to create it:** For example, the moment we think of disrespecting someone, how does it feel within? Comfortable or uncomfortable? Why is this happening? Because we have the faculty of natural acceptance as a part and parcel of our being and it keeps hinting that what we are feeling, thinking or doing is in harmony with our own natural acceptance or not. 6. **Natural acceptance is definite:** This we can directly verify by asking, what is naturally acceptable to us – relationship or opposition, harmony or disharmony, co-existence or struggle? In all situation it is definite. ***(Any 5 point 5 marks)***
3.	(a)	**Why is right understanding required for ensuring physical facility? How does it result in mutual prosperity? Illustrate with the help of two personal examples.** if the ***right understanding*** is missing, we are not able to identify our need for physical facility. Now, if we are not able to identify our need for physical facility then regardless of how much physical facility we accumulate, we never feel that we have enough. We keep wanting more. This feeling of not having enough is the feeling of deprivation. Now, if we have a feeling of deprivation, will we think of nurturing others or exploiting others? Find it out. Again, the answer is simple – we will think of exploiting others to get more and more physical facility. ***(2 mark)*** With right understanding, we can identify the need for physical facility. We can also learn how to produce using a mutually enriching production process. Once we are able to ensure the availability of more than required physical facility, we have a feeling of ***mutual prosperity.*** **(2 mark)** Two examples ***(1 Mark Each)***

(b) **Critically examine the prevailing notions of happiness and prosperity in the society. What are the consequences of these notions?**

The prevailing notions of happiness and prosperity are:

1. **Continuity of Happiness from Physical Facility**
   Is it possible to ensure continuity of happiness by the consumption of physical facility, and the enjoyment of favourable sensation? Let us study this phenomenon and see what is taking place.
   Physical thing → Contact with Body → Sensation (from Body) → Tasted by Self
   — If taste is favourable → Happiness (Temporary)
   — If taste is unfavourable → Unhappiness (Temporary)
   We get happiness, or what appears to be happiness, when we eat our favourite sweet. What is happening is that a physical thing, this sweet, is coming in contact with our tongue. At that point, we can taste the sweet. Taste is a sensation. In case we find the sensation to be favourable, we feel happy. If we find the sensation to be unfavourable, we feel unhappy. You can observe this for any sensation – sound, touch, sight, taste or smell. But cannot ensure happiness in continuity.
2. **Continuity of Happiness from Favourable Feeling from Others.**
   The second prevailing notion is that we can be happy by getting favourable feelings from others. We tend to feel happy when others pay attention to us, when others praise us, when others respect us, care for us or express any favourable feeling to us. For that, we keep doing all kinds of things. Wearing clothes of the latest fashion, going to college on that borrowed motorcycle and so many other things like that. Similarly, we may be pretending to be more than what we really are or agreeing with people just to be in their good books and to get their attention.
   All these are examples of our effort for getting feeling from others. We have a deeply held belief that we will get happiness like this. Is it possible to ensure continuity of happiness by receiving favourable feeling from others? Let us study this phenomenon.
   Other Human Being → Expression of Feeling → Feeling Received and Evaluated by Self
   — If feeling is favourable → Happiness (Temporary)
   — If feeling is unfavourable → Unhappiness (Temporary)
   The conclusion is that you do get some sort of happiness from the attention and feeling you get from others. However, this happiness is momentary, very short lived.
3. **Prosperity is assumed to be accumulation of physical facility**

The consequences of these notions are

a. Domination & Exploitation b. Injustice c. Opposition d. Struggle e. Terrorism & War f. Accumulation of physical facility	g. Violation of Natural Laws h. Resource Depletion i. Environmental j. Pollution k. Climate Change l. Global Warming

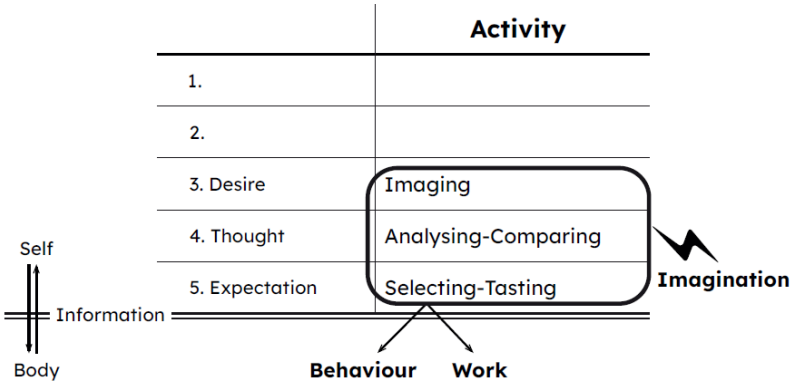

Prevailing notions of happiness and prosperity in the society- 3 Mark
The consequences of these notions-2 Mark

4.	(a)	**Human being is the co-existence of the self and the body. What are three specific distinguishing attributes of the self and the body? Explain with examples.** 1. **Need** A human being is the combination of the **self (मैं)** and the **body (शरीर)**, and each has distinct needs. The **self** needs **happiness**, such as respect, love, and trust. This need is **qualitative** in nature and exists **continuously**—we always want to feel happy and emotionally fulfilled. In contrast, the **body** requires **physical facilities**, such as food, clothing, and shelter. These needs are **quantitative**, **temporary**, and limited in nature. The self's needs are fulfilled through **right understanding and right feelings**, while the body's needs are fulfilled by **physio-chemical elements** like food and water. 2. **Activity** The activities of the self and the body also differ. The **self** is constantly engaged in **desiring, thinking, and expecting**. These activities are continuous and take place within our consciousness. On the other hand, the **body** performs **physical actions** such as eating, walking, and sleeping. These actions are **temporary** and occur only when necessary. This highlights that the self is always active mentally, while the body acts based on needs and rests in between. 3. **Response** The way the self and the body respond is another key difference. The **self** goes through a deeper cognitive process that includes **knowing, assuming, recognizing, and fulfilling**. These are mental and emotional responses that shape our inner world. The **body**, in contrast, simply responds by **recognizing physical needs and fulfilling them**. This shows that the self is **conscious (चैतन्य)**, while the body is **material (जड़)** and functions under the direction of the self. ***Three Attributes -3Marks*** ***Any Example (Not mentioned here)- 2 Mark*** ***or***

Human Being	Self ⟷ Co-existence ⟷ Body	
NEED	Happiness (e.g. Respect)	Physical Facility (e.g. Food)
In Time	Continuous	Temporary
In Quantity	Qualitative (is Feeling)	Quantitative (Required in Limited Quantity)
Fulfilled By	Right Understanding & Right Feeling	Physio-chemical Things
ACTIVITY	Desire, Thought, Expectation...	Eating, Walking...
In Time	Continuous	Temporary
RESPONSE	Knowing, Assuming, Recognising, Fulfilling	Recognising, Fulfilling
	↓ Consciousness	↓ Material

With example (5 mark)

(b) Explain the activities of the Self with a diagram. With the help of an example, show how are they related.

When we say 'activities of the Self', we are generally referring to our imagination. You would be able to see that something going on in your imagination – it may be some desires, thoughts, expectations.

a. ***Desire*** is about 'what you want to be'. It is the name given to the activity of imaging. So, desire is the power for the activity of imaging.

b. ***Thought*** is the power for the activity of analysing, trying to work out the options of 'how to fulfil your desire'. If you have a desire to be happy, you analyse various possibilities for 'how to be happy'.

c. ***Expectation*** is the power for the activity of selecting 'what to get' from outside. Selecting is based on tasting. If you consider happiness to be something you get from favourable sensation, like when you eat tasty food,

Ref. Example

if you desire 'to be owner of a big house', you make an image. This desire gives rise to thoughts about 'how to be owner of a big house' and you consider many options. One of the options may be 'building a big house'. Other options may be 'buying a big house', 'renting a big house' and so on. All these are thoughts about 'how to be owner of a big house'. The big house is your expectation. By ensuring your expectation, you think you will fulfil your desire 'to be owner of a big house'.

Diagram-1 Mark
Explanation of the activities-3 mark
Any Example -1 Mark

5. (a) Give one example each of over evaluation, under evaluation and otherwise evaluation. Why are these evaluations leading to disrespect? What problems do we face because of these wrong evaluations?

1. **Over evaluation – evaluating for more than what it is**
   For example, when you are happy with a child, you start saying that he is great, he can do anything. Is it a right evaluation or over evaluation? Yes, it is an over evaluation.
2. **Under evaluation – evaluating for less than what it is**
   If you are angry with him for some reason, you say, he's good for nothing, he cannot do anything. Is it a right evaluation or under evaluation? Yes, it is an under evaluation.
3. **Otherwise evaluation – evaluating for other than what it is**
4. If you are really very angry with him, you say he is a donkey. You are not even willing to consider him as a human being. He is a human being and you are evaluating him for donkey, for an animal. This is otherwise evaluation.

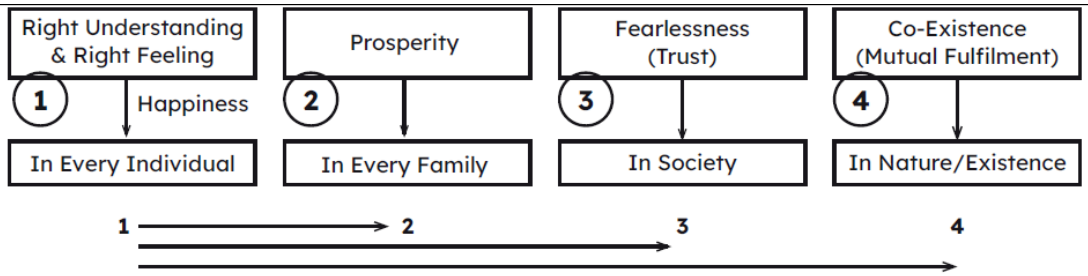

To do the right evaluation, we have to do it on the basis of Self. However, when we are presuming that human being is equal to Body and we have no clarity about the Self, there is no possibility of evaluating on the basis of Self. The very basis of right evaluation is not there. If we don't understand the Self, the right evaluation is not possible. ***Then its lead to disrespect***.

Consequences

Over Evaluation	Under/Otherwise Evaluation
Ego The other is my reference (enslaved) Indefinite Conduct	**Depression** The other is my reference (enslaved) Indefinite Conduct

Any three example of Over Evaluation, Under Evaluation and Otherwise Evaluation-3 Mark
Cause of disrecpect-1 Mark
Cosequences-1 Mark

(b) Narrate about the programs needed to achieve the Comprehensive Human Goal with suitable diagram.

1. **Education-Sanskar -- (leads to) → Right understanding and right feeling (happiness)**
   Having a system of human education-sanskar ensures right understanding and right feeling (happiness) which is the first goal. Of course, it has to reach every individual.
2. **Health-self-regulation -- (leads to) → Health of the Body**
   Having a system for health and self-regulation ensures health of the Body. It also helps us in identifying what is required as physical facility for nurturing, protection and right utilisation of the Body which forms the basis for prosperity. This indirectly ensures co-existence with nature as well.
3. **Production-Work -- (leads to) → Prosperity**
   Production-Work ensures the production of more than the required physical facility. The health-self-regulation and production-work dimensions together lead to fulfilment of the second goal of prosperity in every family. Also, if production is done in the manner which is cyclic and mutually enriching, it will contribute to the mutual fulfilment (co-existence) with rest of nature which is the fourth goal.
4. **Justice-Preservation -- (leads to) → Fearlessness and Co-existence (respectively)**
   If human-human relationship is understood, accepted, fulfilled and rightly evaluated, it ensures mutual happiness or justice. Then there is trust (fearlessness) in the society. Justice ensures the fulfilment of the third goal. Preservation leads to fulfilment of relationship of human being with rest of nature which means it fulfils the fourth goal of co-existence (mutual fulfilment) with nature.
5. **Exchange–storage -- (leads to) → Prosperity and Fearlessness**
   Finally, exchange and storage with a feeling of mutual fulfilment, rather than a feeling of exploitation, will be an aid in ensuring prosperity in the family and also contribute to fearlessness (trust) in society.

Digram-1Mark
Explanation-4 mark

6.	(a)	The four orders in nature have been classified on the basis of their distinct activity, innateness, natural characteristics and inheritance. Explain with one example for each order. **1. Material Order** • **Activity**: Composition and decomposition, such as combining or breaking down elements. • **Innateness**: Simply exists — it does not grow or reproduce. • **Natural Characteristic**: Participates through physical formation and breakdown **Inheritance**: Based on outcomes, i.e., changes are due to external factors. • **Example**: **Soil** – it forms, breaks down, and supports plant life but has no internal motivation or growth mechanism.

2. Plant Order (प्राण)

- **Activity**: Respiration and photosynthesis.
- **Innateness**: Nurturing, they grow and nourish themselves.
- **Natural Characteristic**: Participate in recycling and nutrition exchange.
- **Inheritance**: Seed-based — traits are passed through seeds.
- **Example**: **Mango Tree** – it grows, breathes, reproduces through seeds, and contributes to the ecosystem.

3. Animal Order

- **Activity**: Bodily actions like eating and movement, selection and tasting.
- **Innateness**: Desire to live .
- **Natural Characteristic**: Participates through the body and may show kindness or cruelty (.
- **Inheritance**: Lineage-based.
- **Example**: **Dog** – it breathes, moves, responds to feelings, and passes traits through its offspring.

4. Human Order

- **Activity**: Thinking, analysis, contemplation, realization.
- **Innateness**: Aspiration to live with happiness and understanding (.
- **Natural Characteristic**: Participates through the **self (I)** and shows values like generosity, perseverance, etc.
- **Inheritance**: Through education and cultural learning .
- **Example**: **A teacher** – uses reasoning, feels emotions, learns, teaches, and lives consciously with values.

Explanation --5 mark

OR===*5 mark*

FOUR ORDERS	UNITS	ACTIVITY	INNATENESS (Self-organisation)	NATURAL CHARACTERISTIC (Participation)	INHERITANCE
Physical Order	Soil, Metal...	Formation - Deformation	Existence	Composition Decomposition	Constitution based
Bio Order	Plants, Trees...	"-" + Respiration	" + Growth	" + Nurture-Worsen	Seed based
Animal Order	Animal, Birds...	"-" in Body	", " in Body	", " in Body	Breed based
		Selecting-Tasting in the Self	Will to live in the Self	Cruelty, Non-cruelty in the Self	
Human Order	Human Beings	"-" in Body	", " in Body	", " in Body	Education & Sanskar based
		Imaging, Analysing-Comparing, Selecting-Tasting in the Self	Will to live with Continuous happiness in the Self	Next Generation	
		Potential for Contemplation, Understanding & Realisation in the Self	Right Feeling & Thought in the Self ↑ Right Understanding in the Self	Perseverance, Bravery, Generosity in the Self	Human Education -Sanskar

(b) **Why is the human order, by and large, not mutually fulfilling for any of the four orders? Is your natural acceptance to be fulfilling for all four orders? What does human being need to do to be mutually fulfilling for each of the four orders?**

Why is the human order, by and large, not mutually fulfilling for any of the four orders? (2 Mark)

Human being is not only unfulfilling for the other three orders, rather it is dominating and exploiting them, to the extent of global warming and climate change. Some of the indicators of human activity that is disturbing the harmony in nature are:

a. Atmospheric CO2 level, that was stable at 250-350PPM in the last
b. few thousand years, has increased tremendously in the last hundred
c. years.
d. The drying up of rivers, lakes and underground aquifers.
e. Rapid melting of polar and glacial ice and potential of rising sea
f. levels.
g. Depletion of forest cover.
h. Farmland being taken up for human habitation / industrialisation.
i. Rapid species loss and sharp reduction in bio-diversity.

Is your natural acceptance to be fulfilling for all four orders? (1 Mark)

However, when we refer to our natural acceptance, we want to fulfil all the four orders.

What does human being need to do to be mutually fulfilling for each of the four orders? (2 Mark)

Order	Human Participation for Mutual Fulfilment
Physica I Order	Facilitating the **existence** of the unit by ensuring a conducive environment and maintaining / ensuring its **constitution**
Bio Order	Facilitating the unit's **growth** by ensuring a conducive environment and maintaining / ensuring its **seed**
Animal Order	Facilitating nurturing and caring of the animal body by ensuring physical facility and suitable environment for its existence and growth. Facilitating the fulfilment of the **will** of the animal Self **to live**. Facilitating the maintenance of its tradition, by maintaining its **breed**
Human Order	Facilitating nurturing and caring of the human body by ensuring physical facility and suitable environment for existence and growth. Facilitating the fulfilment of the **will** of the Self **to live with continuous happiness** by providing **human education-sanskar** to every individual, and participating in developing / maintaining an undivided society and universal human order

7. (a) **Explain the term 'Professional Ethics'? Discuss the prevailing approaches towards the promotion of Professional Ethics and their inadequacy. What would be an effective way to work towards developing ethical competence?**

Explain the term 'Professional Ethics'? (1-Mark)

Professional ethics can be seen as the code of ethical conduct of the profession. Ethical conduct of profession implies the right utilisation of one's professional skills in the larger order towards the fulfilment of comprehensive human goal.

Discuss the prevailing approaches towards the promotion of Professional Ethics and their inadequacy. (3 Mark)

		The following methods are being increasingly proposed and implemented: a. Promoting awareness about professional ethics by introducing new courses, refresher programs and case studies b. Administering oaths and prescribing codes of ethical conduct for specific professional disciplines c. Setting up mechanisms for intensive audit inspection and monitoring the activities d. Framing more stringent laws and devising harder punishments for offences e. Promoting transparency in working systems through mechanisms like RTI (Right to Information Act), etc. f. Carrying out 'sting operations' and widely publicising serious lapses in ethical conduct of profession through media g. Encouraging whistle blowing by individuals or groups h. Setting up Lokpals, vigilance commissions, ethics committees, tribunals, consumer protection forums, etc. i. Filing public interest litigations, etc. ***What would be an effective way to work towards developing ethical competence? (1 Mark)*** An effective way to work towards **developing ethical competence**, as referred to in **Universal Human Values (UHV)**, involves a combination of **self-exploration**, **right understanding**, and **living accordingly**. The ethical human conduct can be further grasped in terms of values, policy and character a. Human Values – Understanding of role of Human Being in Existence b. Policy – Thought of how to express (live with) Human Values **c.** Character – Expression of Human Values in Behaviour, Work and Participation in the Larger Order
	(b)	**Explain the holistic management model and discuss the specific characteristics/criteria of such a model.** ***Explain the holistic management model (1 Mark)*** Primarily management models are to be relationship based, cooperative and ensuring justice in terms of mutual fulfilment and not coercive and exploitative. The management needs to focus at the fulfilment of the people involved in the production system as well the users of the produce and not to profit-mania. **Discuss the specific characteristics/criteria of such a model. *(4 Mark)*** The following criteria can be chosen for a ***holistic*** management model: • The whole unit working as a well-knit family • Cooperative, motivational and mutually fulfilling • Ensuring correct appraisal of human labour and skills • Targeting employer-employee as well as consumer satisfaction and not profit maximization • Sharing of responsibility and participative mode of management • Continuous value addition of the persons involved • Effectively integrating individual competencies and complementarity
